

## EUP40A-1H24V-1 (Product No.:103200130101)

### Summary

EUP40A-1H24V-1 is a constant voltage mode output LED driver. This driver can be controlled by external signal (0/1-10V active signal, adjustable resistance and PWM signal) to achieve a smooth dimming effect.

### Product Features

- Single channel constant voltage output,1.7A Max
- Support 3-in-1 dimming mode(0/1-10V active signal, adjustable resistance, PWM)
- Built-in active PFC function
- Dimming range of 0-100%, and dimming effect smooth, no flicker
- 100% output when no dimming signal input, can be used as normal power supply
- Over load protection; Over temperature protection; Short circuit protection
- Suitable for indoor LED lighting application, such as LED strips, spot light, wall washer,and so on

## Cautions

- 1.This product should be installed by qualified personnel.
- 2.This product is non waterproof, need to avoid sun and rain.In case of outdoor use, please ensure it is mounted in a water proof enclosure.
- 3.Good heat dissipation conditions extend product life. Please install the product in a well-ventilated environment.
- 4.Please make sure LED power supply output voltage, current is used to meet the product requirements.
- 5.Please ensure that adequate sized cable is used from the controller to the LED lights to carry the current. Please also ensure that the cable is secured tightly in the connector.
- 6.Due to safety concerns, PVC or rubber cord of 0.75- 1.5mm<sup>2</sup> is recommended for input and output terminal(s)(excluding signal terminals). Flat power cord is not suitable.Ensure all wire connections and polarities are correct before applying power to avoid any damages to the LED lights.
- 7.In case of malfunction, do not repair it yourself.
